Komatsu hydraulic breakers

Exceptional performance and efficiency

The hydraulic breakers provide superior impact energy in a variety of rock and concrete demolition applications: you can count on exceptional performance and efficiency whether you're scaling a tunnel, running a pedestal-boom on a quarry, or tearing out reinforced concrete masonry.

B-series

- Accumulator-free
- Straightforward, powerful
- Unbeatable reliability
- Optional automatic greasing

H-series

- Accumulator
- Compact: light, simple, reliable
- Large: Powerful, two-speed

V-series

- Accumulator
- Fully variable speed selection
- Highest production ratio in any application

Select the right tool for the job!

Using the correct tool is the first step in obtaining maximum life and performance from the breaker. It will also decrease overall running costs and increase productivity.

Pyramid

Application: secondary breaking, demolition, mass excavation
Material: low and medium hardness, homogeneous structure

Blunt

Application: secondary breaking
Material: high hardness, abrasive

Chisel

Application: trenching, mass excavation
Material: low and medium hardness, non-homogeneous structure, abrasive

Moil point

Application: secondary breaking, demolition, mass excavation
Material: low and medium hardness, non-homogeneous structure

Specials

Uniquely designed tools are available for special applications, such as extremely abrasive material, soft material or tunnelling.

B-series hydraulic breakers

Simple, powerful, reliable

Komatsu B-series hydraulic breakers provide superior impact energy and breaking force in any application.

The simplicity of their design combined with high quality components results in breakers that can fit on any machine, and work under any condition, for many years. With up to 30% less components, these breakers require little maintenance, are easy to service and offer market-leading reliability. The optional automatic lubrication can extend their lifetime even further.

B-series

Models: 12

Operating weight: 90 - 3850 kg

Machine class: 0.7 - 50 t

Komatsu carrier: PC09 - PC490/PC500

Oil flow: 18 - 300 l/min

Tool diameter: 40 - 170 mm

Quality you can rely on

Komatsu Genuine tools are much more than just machined pieces of steel. The best alloys and careful heat treatment guarantee a long wear life.

- These breakers feature 30% fewer parts than their competitors – and every single one of those parts is designed to Komatsu's strict engineering and quality standards
- Only two moving components to keep operating and maintenance cost down
- Accumulator-free technology

First-class comfort

- The fully suspended powercell reduces shock wave transmission, increasing operator comfort, reducing noise and protecting the carrier
- Blank firing protection as standard as of the JTHB120-3B and up. Piston movement is stopped when insufficient pressure is applied on the tool. This prevents damage to the tie rods, retaining pins and tools

JTHB50WB-3
Specifically designed for WB93/97

Heavy-duty housing
Extremely tough and wear-resistant housing – on every single model!

Optional automatic lubrication
Provides continuous greasing, extending the lifetime of the bushings and tool, protecting your investment

H-series hydraulic breakers

An ace up their sleeve

Based on accumulator-type technology, these breakers deliver consistent impact power in any environment, on any machine. Innovative features and clever design improve production while lowering the total cost of ownership significantly.

H-series

Models: 15

Operating weight: 73 - 4994 kg

Machine class: 0.7 - 80 t

Komatsu carrier: PC09 - PC700/PC850

Oil flow: 12 - 380 l/min

Tool diameter: 37 - 190 mm

Compact range

- 11 breakers for utility and midi excavators
- Compact and light
- Simple and reliable
- No tie rods
- Automatic pressure regulation
- High back pressure tolerance
- Blank firing protection on all models

Large range

- 4 heavy-duty breakers
- Carrier class: 20 to 80 t
- Automatic frequency adjustment
- Automatic greasing
- Blank firing protection
- Swivel hose couplings
- Field-replaceable bushings
- Adjustable pressure regulation
- Integrated dust prevention

First-class comfort

- The fully suspended powercell reduces shock wave transmission
- Fully automatic 2-speed selection protects the breaker from excessive impact forces and increases productivity in softer condition
- Advanced blank firing protection as standard on all models
- The optional dust suppression kit uses spray nozzles to reduce dust emissions while operating the breaker

Full power, day after day

- The large diaphragm accumulator smoothens pressure spikes, protecting the carrier, and maintains the correct nitrogen pressure
- The pressure regulator valve maintains a constant operating pressure, providing powerful impact strokes, whatever the conditions
- The H-series utility breakers can work on any machine, thanks to their high tolerance for back pressure
- The hoses are connected on articulating couplings, allowing them to move freely, for less breakage risk and a longer lifetime

V-series hydraulic breakers

Unrivalled productivity and lowest cost per ton

Komatsu V-series breakers are designed for maximum productivity in any application, whilst lowering cost per ton. They are at home in any application, whether it's demolition, mass excavation or secondary breaking.

V-series

Models: 6

Operating weight: 1721 - 7599 kg

Machine class: 18 - 120 t

Komatsu carrier: PC210 - PC1250

Oil flow: 120 - 550 l/min

Tool diameter: 122 - 214 mm

First-class comfort

- The fully suspended powercell reduces shock wave transmission
- Advanced blank firing protection as standard
- The optional dust suppression kit uses spray nozzles to reduce dust emissions while operating the breaker

Maximised productivity

- More than 90% energy recovery through the use of a recovery valve, making these the most efficient breakers in their class
- Fully variable automatic speed selection enabling the highest production in any application, these breakers can select exactly the right amount of power to break through the material, without wasting any energy

Peace of mind

- Tool Protection System
- The large diaphragm accumulator smoothens pressure spikes, protecting the carrier
- The pressure regulator valve maintains a constant operating pressure, providing powerful impact strokes, whatever the conditions
- The hoses are connected on articulated couplings, allowing them to move freely, for less breakage risk and a longer lifetime
- The optional dust wiper bushing provides additional protection to the breaker, by adding an extra seal around the tool. Ideal for high-dust applications or tunnelling

Fully variable technology

Depending on the application's hardness, V-series breakers automatically select the optimal piston stroke length and speed. By adjusting to either hard material, with long and powerful strokes, or to softer material, with shorter, faster strokes, the highest production output is consistently achieved, with no waste of impact energy.

300% energy variation in 1s
